

genpdf Image Tests

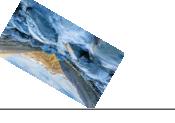

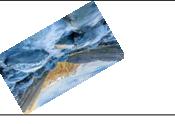

You may also: override the position, dpi, and/or default line-breaks, etc. See image here =>

Table with image format/scaling tests:

Format	1:1	Half Size	Double Size
BMP	 A full-size BMP image of a glacier landscape.	 A half-sized version of the BMP image.	 A double-sized version of the BMP image.
JPG	 A full-size JPG image of a glacier landscape.	 A half-sized version of the JPG image.	 A double-sized version of the JPG image.
PNG	 A full-size PNG image of a glacier landscape.	 A half-sized version of the PNG image.	 A double-sized version of the PNG image.

Table with image rotation/offset calculation tests:

Rot	30°	45°	90°	120°	150°	180°
Positive	 A rotated image of a glacier landscape at 30°.	 A rotated image of a glacier landscape at 45°.	 A rotated image of a glacier landscape at 90°.	 A rotated image of a glacier landscape at 120°.	 A rotated image of a glacier landscape at 150°.	 A rotated image of a glacier landscape at 180°.
Negative	 A rotated image of a glacier landscape at -30°.	 A rotated image of a glacier landscape at -45°.	 A rotated image of a glacier landscape at -90°.	 A rotated image of a glacier landscape at -120°.	 A rotated image of a glacier landscape at -150°.	 A rotated image of a glacier landscape at -180°.

Even *alpha images* are supported now:
